Executive Summary

Total cost: 0.00

Records: 0

Governance findings: 29

Anomalies detected: 21

Recommendations: 19

Monthly Cloud Spend Report

No monthly spend data available.

Optimization Findings

- [None] GCP Compute: None (Est. savings 300.00)
- [None] AWS EBS: None (Est. savings 120.00)
- [None] Azure VM: None (Est. savings 450.00)
- [Reduce unnecessary SaaS spend] Microsoft 365: None (Est. savings 5,400.00)
- [MEDIUM] AmazonEC2: AWS — AmazonEC2 Optimization. AmazonEC2 drives 46.8% of spend. Prioritize rightsizing and con
- [HIGH] Compute Engine: GCP — Compute Engine Optimization. Compute Engine drives 85.3% of spend. Prioritize rightsizing
- [HIGH] Virtual Machines: AZURE — Virtual Machines Optimization. Virtual Machines drives 88.4% of spend. Prioritize rightsizi
- [HIGH] Virtual Machines: Optimize Virtual Machines spend on AZURE — highest cost driver at \$1,899.27. Review reserved ca
- [HIGH] AmazonEC2: Optimize AmazonEC2 spend on AWS — highest cost driver at \$1.96. Review reserved capacity and righ
- [HIGH] Compute Engine: Optimize Compute Engine spend on GCP — highest cost driver at \$605.16. Review reserved capaci

Governance Scorecard

Total governance findings: 29

- Anomaly: 29
- Top finding: awskms (Anomaly)
- Top finding: Virtual Machines (Anomaly)
- Top finding: Virtual Machines (Anomaly)
- Top finding: Virtual Machines (Anomaly)
